

Rank by button is superfluous.

Please remove.

Reason:

There are no points, there is only money

This needs to lead to a setup box before the challenge is issued or how do the players know what they are playing for?

Similar options to the tournament setup are required here.

How much? How many frames to win?

Where? When? What rules?

Am I giving or asking for a handicap?

When these details are entered into the relevant text and number boxes then the player will click a final issue challenge button.

The player must have enough funds in their account to issue the challenge.
